Alier Abogados has moved its office from Torrejón de Ardoz to Calle Serrano, 240

Alier Abogados has recently moved from Calle Trópico number 6, in Torrejón de Ardoz, where the Atisa Group has its headquarters, to the representative Calle de Serrano, in Madrid, specifically to number 240.

"With the opening of our new office, we are meeting one of the milestones we set ourselves in the roadmap of the strategic plan for the launch of Alier Abogados. We decided that it was essential to move the head office of the law firm to a representative area of Madrid for several important reasons. The first and fundamental was the ease of access for our clients and our team. We therefore looked for an office in a central but 'friendly' area, with good communications and without entry restrictions or traffic saturation, which would allow all of them to access our offices easily and comfortably," said Pilar Jaquete Lomba, Alier Abogados managing partner.

"On the other hand, we were also looking for a large facility, which would allow us the future growth we have planned, and which would also be in line with our values and DNA. At Alier Abogados, and throughout the Atisa Group, we are aware that our main asset is the people who are part of the team and this is reflected, among many other things, in our offices, which must be comfortable, with rest areas, dining room, natural light, technological means, etc. We have achieved all this in our new facilities at Serrano 240," Jaquete Lomba concluded.

The firm, whose objective is "to become one of the twenty leading firms on the Spanish Legal scene", has a strong specialisation in Business Law, specifically in Labour, Tax, Civil, Commercial and Corporate matters, and in New Technologies and Data Protection Law.

Alier Abogados was founded in November 2019 by the Atisa Group, a leading company specialised in outsourcing back office processes in the fields of Labour, Tax, Finance and Accounting. During this time, the firm has hired leading professionals in their respective areas of specialisation, as well as integrating the firm [Alonso y Asociados](#).
