Andersen provided advisory services to the **Scalian Group** in its acquisition of 100% of the share capital of **Dulin Technologies**, a Spanish consultancy specializing in cybersecurity and Identity and Access Management (IAM). This strategic move aligns with Scalian's goal to expand its presence in the industrial, banking, healthcare, automotive, and defense sectors.

Scalian Group, a French company with a turnover exceeding 550 million euros, positions itself as a key player in the cybersecurity domain through the acquisition of Dulin. This operation strengthens Scalian's foothold in the cybersecurity sector, contributing to its objective of becoming a leader in the industry.

The team from **Andersen** spearheading the advisory for this transaction was led by partner of Corporate and M&A **Antonio Cañadas** (pictured left), alongside with Senior Associate **Borja Echegoyen** (pictured right) and Lawyer **Javier Tejedor**, within the same department. The acquisition marks a significant strategic move for both Scalian and Dulin Technologies, enhancing their capabilities in the ever-evolving landscape of cybersecurity.
