Andersen has advised StockAgile, the omnichannel management software managed by Novadigits Technologies to optimise inventory and sales for SMEs, in the closing of a 2.5 million euro financing round, led by venture capital firm Nauta Capital, 4Founders Capital, Angels and Zone2Boost.

The company will use this capital injection to improve the product and customer service, thus promoting a new sales and marketing strategy with the aim of positioning itself as a leader in omnichannel sales management in the retail sector.

Jaime Aguilar (pictured above), partner of Andersen's corporate and m&a department, has been responsible for advising on the transaction, together with the lawyer **Santiago López Vila**.
