Caiado Guerreiro has advised LoRin on the entire process related to the registration of the IoT network with ANACOM and the development of the company's business.

Following LoRin's business implementation policy, Caiado Guerreiro advised on the complete registration of the IoT (Internet of Things) network with ANACOM, and developing the company's business through several contracts signed with partner entities.

The team from Caiado Guerreiro advising on the deal, was led by **Ricardo Lopes**, partner, and associates **Zuzanna Maria Sadlowska** and **João Sismeiro Pereira**.

"We like working with Lorin because it is an innovative technology, linked to the Internet of Things, which also requires lawyers to have technological knowledge," explains **João Caiado Guerreiro**, managing partner at Caiado Guerreiro.

LoRin, based in Lisbon, is building the IoT network in Portugal. These networks enable the installation of a range of solutions favourable not only to the improvement of connectivity in important sectors of activity, such as agriculture, transport and industry, but also to the acceleration and development of smart cities.
