CMS Albiñana & Suárez de Lezo has grown by 18% in turnover and exceeds 45 million euros in 2022.

The international law firm CMS Albiñana & Suárez de Lezo announces that in the 2022 financial year it achieved revenues of 46.5 million euros, which translates into an increase of 18% compared to the same figure for the 2021 financial year. These results confirm the positive trend that the firm has been experiencing since 2019.

This growth is reflected in all its practice areas, which have worked together throughout 2022 to position themselves within the strategic sectors of the market. As a result, the Firm has been involved in some of the most relevant transactions of the year, including advising Siemens Gamesa on the sale of a portfolio of 3.9GWs of onshore wind projects to SSE Renewables.

**César Albiñana**, managing partner of the firm, highlights that "these figures are the result of the efforts of our team and the work they have carried out throughout the year. We have great confidence from our clients and that is the reason why we can continue to grow and advance, something for which we are very proud and at the same time enormously grateful".
