Category: [Archive](#)

Cuatrecasas advised Eyecon, a Portuguese company based in the Azores, regarding the Soilrisk project.

The team from **Cuatrecasas** was led by the coordinator of the area of Intellectual Property, Technology, Media and Telecommunications **Sónia Queiróz Vaz**, and associate **Teresa Isabel Gonçalves**.

Soilrisk is an application that provides and uses satellite data to detect impending landslides, providing information on landslide risk, soil deformation, vegetation index, humidity and precipitation data.
