Cuatrecasas has opened its new offices in Valencia. The Edificio Aqua, with more than 1,700 m2, is located at Calle Menorca 19.

It is a building with avant-garde architecture and a groundbreaking design, strategically located opposite the City of Arts and Sciences. Its intelligent facilities are equipped with the latest technology and the most advanced security systems. It also has great luminosity and transparency that promotes wellbeing and comfort and stimulates professionals, who will be able to work in an eminently digital and functional environment.

"The new offices aim to be a lever for change. The values underpinning our project remain unchanged: the quality of work remains at the heart of our strategy, along with social commitment and a focus on people's well-being. On this basis we are evolving to promote a more cohesive and collaborative work culture, through more innovative spaces," says the firm's managing partner, **Francisco Picó**.
