Fbb Partners, a legal boutique specialised in renewable energy and green hydrogen, has joined the UK Green Hydrogen Association (UK HFCA) and the Spanish Hydrogen Association (Aeh2).

UK HFCA is a UK trade association with more than 100 members including several national and international companies: Bosch, Northen Gas Networks, Hidrogen London, Reynolds, Rolls-Royce, among others.

On the other hand, Fbb Partners is a firm led by **Borja López García** (pictured), who has more than 15 years of experience both in international firms and in the renewable energy and infrastructure industry.

With the entry of Fbb Partners in the UK HFCA association, the legal boutique will be able to connect with new international projects that attract the attention of Spanish and foreign investors in the field of green hydrogen.

The key areas on which Fbb Partners works and advises are green hydrogen, waste to energy projects, photovoltaic, wind and cogeneration. By joining the UK HFCA, Fbb Partners confirms its commitment to further its expansion and specialisation in a market that is in constant transformation.
