Category: [Archive](#)

Law firm Estudio Jurídico Internacional López-Ibor Mayor y Asociados has strengthened its

structure with the hiring of José María Moutas de las Alas Pumariño as a new partner

José María Moutas de las Alas Pumariño (pictured) is a Law graduate from the University CEU San Pablo. He has developed his professional career as a lawyer linked mainly to the energy and industrial sectors, in which he has worked as a Legal director for investment funds and industrial entities. In his career over the last twelve years, it is worth highlighting his position as head of Legal of Alantra's renewable energy fund management company; as well as the of ENCE Energía y Celulosa, S.A.

José María's experience in Regulated Sectors, Commercial contracts and Corporate Law, both in listed and non-listed companies, and his international vocation make this incorporation a natural step for the firm in the consolidation of its already long history as a Legal services provider boutique within the energy and environmental areas, in which it is one of the leading law firms.
