PLMJ has advised Ecologis – a joint venture between the Swedish group Europi Property Group and Bedrock Capital Partners – on the acquisition of a new portfolio of logistics assets from several real estate funds managed by Santander Asset Management.

PLMJ's multidisciplinary team included **Sofia Gomes da Costa**, **Fernando Costal Carinhas** and **Sofia Coutinho**, from the Real Estate and Tourism area, and **Gonçalo dos Reis Martins** and **Nuno Morgado Pereira**, from the Banking and Finance area.

This real estate portfolio comprises a gross construction area of approximately 24,000m², including, among others, a set of six warehouses in the Norcentro business and logistics center, in Alverca, and a warehouse in Quinta da Marquesa, in Palmela, all occupied by reference in the national market.

This is Ecologis' fifth operation in less than a year, increasing the area owned by the joint venture for more than 150,000 m².
