PLMJ has moved to new office premises and is now located at the Porto Office Park

PLMJ's new office space (featured photo by Francisco Nogueira) is located at the Porto Office Park, an innovative project by the developer Violas Ferreira comprising two corporate buildings in the Boavista area. With a strong focus on sustainability and innovation, the project is certified by the BREEAM (Building Research Establishment's Environmental Assessment Method) with an excellent rating.

Located on the 8th floor, clients are welcomed to an art gallery that extends to the exterior space where works by the PLMJ Foundation are exhibited.

Bruno Ferreira, PLMJ's managing partner said: "2021 was a year with very important steps for PLMJ. In a challenging context on so many levels, we confidently moved forward with the firm's major investment projects and the change of premises in Porto was a long-awaited step. At Porto Office Park, in Boavista, we found a location and a building that are unique in the city and that live up to our people, our customers and our ambition. We are very proud of the final result, which also takes part of the PLMJ Foundation's collection to the new premises, to be shared with those who visit us."
