Roca Junyent has agreed a deal to use Luminance's artificial intelligence (AI) technology with the aim of speeding up M&A due diligence processes.

Roca Junyent has become the fourteenth organisation in Spain to adopt the AI platform, according to Luminance.

Roca Junyent partner **Xavier Costa Arnau** (pictured), said: "Our objective is to see how Luminance could result in significant time savings during the due diligence process, compared to our current

manual review process".
