TELLES has advised the shareholders of MWTechnologies on the sale of its business in Portugal to Amplitude Laser Group, a leading global manufacturer of femtosecond lasers for scientific, medical and industrial applications.

TELLES' team that represented MWTechnologies was led by (pictured from left to right) Commercial, Corporate and M&A partner, **Miguel Carvalho** and it included **Delber Pinto Gomes** and **João Pedro Folhadela**, associates from the same practice.

With the acquisition of MWTechnologies, which is renamed Amplitude Portugal, the French multinational Amplitude Laser Group reinforces its technological development and production capacity and consummates its entry in the Portuguese market.
