Vieira de Almeida & Associados (VdA) assisted GreenVolt – Energias Renováveis in the successful €100M rights issue and in the listing of the new shares in Euronext Lisbon regulated market scheduled to occur on 11 July, following the public offering thereof, targeting existing shareholders in the exercise of their pre-emption rights and investors acquiring such rights.

After having assisted GreenVolt in its successful IPO in July 2021 and in the inaugural green bond issue in November 2021, VdA has represented GreenVolt in this transaction, completed within two months, enabling GreenVolt to increase its share capital in a volatile and challenging environment and hence strengthen the level of its own funds to continue pursuing its growth plans.

VdA acted with a team led by partners **Hugo Moredo Santos** (pictured left) and **Pedro Cassiano Santos** (pictured right) (B&F, capital markets) and **Ana Luís de Sousa** (pictured - Energy), and comprising in total more than 10 other associates, including **Francisca César Machado, Sara Santos Dias, Inês Freire da Veiga, Diogo Bordeira Neves** and **João Ramalho Dias** (B&F, capital markets), **Maria Gorjão Henriques** (energy), **Rita Pereira Abreu** (tax), and **Vanessa Cardoso Pires** and **Carolina Tita Maurício** (corporate services unit).
