**ZURBARÁN continues to grow with the integration of [A]CODE Abogados**

ZURBARÁN has reached an agreement to merge with IACODE Abogados.

A spokesperson said: "With this alliance, ZURBARÁN wants to strengthen one of the most emerging niche markets in the Spanish market, private equity, where IACODE Abogados is a pioneer, and where its partner Ricardo Torres García is recognised as the number one lawyer in start ups in Spain."

The spokesperson added: "With this integration ZURBARÁN also strengthens the Urban Planning practice area, one of the key pillars of IACODE Abogados, an area founded by José Miguel Angulo, a professional with a relevant trajectory for 40 years, and currently led by Paloma Angulo, as well as a new Sports Law division. This is a new step forward for ZURBARÁN, which manages to expand its areas of practice, and reaches the most avant-garde and technological sectors, thus furthering the firm's expansion strategy, which plans to grow strategically in the coming years."

Ricardo Astorga (pictured left), managing partner of ZURBARÁN, said: "With this operation we have made progress in our strategic plan to expand areas of work and services, always seeking to meet the current demands and trends of the Legal sector, consolidating a multidisciplinary model, with a very measured dimension, characterised by the provision of personalised service by partners and professionals with extensive experience and high added value."

Ricardo Torres (pictured right), CEO of IACODE, said: "The integration is based on common values: excellence in work and leadership in the areas of service provision, the same vision of a national law firm with a relevant international component, a strong commitment to the technological sector and the same approach to the growth model."
